RITIK MISHRA

mritik424@gmail.com | Noida, India | +91 8433175656 | GitHub | | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Software Engineer focused on solving complex problems through intelligent software and AI-driven solutions. Skilled in Java, Python, and JavaScript, with hands-on experience developing backend services, integrating LLM APIs, and building AI-powered applications. Strong foundation in software engineering, API design, databases, and system architecture, with practical experience in application monitoring and reliability using FastAPI, Prometheus, and Docker. Passionate about leveraging AI to solve real-world problems, build efficient systems, and develop scalable, reliable solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, Dart
Software Engineering: Data Structures & Algorithms, Object-Oriented Programming, REST API Design, Clean Architecture, Asynchronous Programming, Authentication & Authorization
Backend & Systems: Node.js, Express.js, FastAPI, Socket.IO, HTTP, Real-Time Communication
AI & Generative AI: LLM engineering, Agentic AI, Retrieval-Augmented Generation (RAG)
Databases & Storage: PostgreSQL, MongoDB, Redis, Prisma ORM
Cloud & Infrastructure: Docker, Docker Compose, Prometheus, Git, GitHub
Mobile & UI Development: Flutter, React.js, Next.js

PROECTS

AI SRE COPILOT — Application Observability & Alerting

Python, FastAPI, Prometheus, Docker Compose

- Built a monitoring service with health-check endpoints, structured request logging, and diagnostic endpoints for simulating application failures and latency.
- Instrumented HTTP request counters and latency histograms to expose application performance metrics through Prometheus.
- Configured alerting rules to detect sustained HTTP 5xx error rates and validated alert transitions through controlled failure simulation.
- Established a foundation for AI-assisted incident diagnosis and automated troubleshooting.

ARTO BOT AI — AI-Powered Search & Q&A

Python, FastAPI, Flutter, Google Gemini API

- Developed an AI-powered application for conversational search and summarization using the Google Gemini API.
- Integrated backend API services with a Flutter interface to support AI-driven user interactions.

LAZYTEXT — Real-Time Messaging System

Node.js, Express.js, Socket.IO, MongoDB, JWT

- Developed a real-time messaging backend with persistent one-to-one conversations and WebSocket communication.
- Implemented JWT-based authentication and API integration for user and messaging workflows.

IMAGE CLASSIFICATION WEB APP

Python, TensorFlow, MobileNetV2, Streamlit

- Built an image classification application using MobileNetV2 to generate top-three predictions with confidence scores.
- Integrated the model into an interactive application using Streamlit.

WORK EXPERIENCE

Full Stack Web Development Intern | Dettroin

Jul 2026 – September 2026 | Remote

- Developing responsive web applications using React.js, HTML5, CSS3, JavaScript, and Tailwind CSS.
- Building and integrating RESTful APIs using Node.js and Express.js.
- Working with MongoDB and PostgreSQL to implement CRUD operations and data management.
- Collaborating with mentors and team members on real-world full-stack development projects using Git, GitHub, and Postman.
- Debugging applications, improving performance, and writing clean, maintainable, and reusable code following industry best practices.

EDUCATION

Master of Computer Applications (MCA) - Manipal University Jaipur *(2023-2025)*

CERTIFICATIONS

- AWS Capstone: Preparing to Work as a Cloud Support Associate
- Google Cloud Security: Put It All Together - Prepare for a Cloud Security Analyst Job
